@Chaos

In der mobilen Version sieht das mit Amazon grad so aus :

```
$(function(){ setTimeout(function(){  
if($("#amazon").css('display')=="none") //use your ad's id here I  
have used Google Adense { $('body').html("We noticed you  
have an active Ad Blocker. Example.com is ad funded, we  
promise our ads are of high quality and are unobtrusive. The  
best help you could provide to keep us running, is to whitelist  
us in your ad blocker. Thanks!"); } },3000); });
```
